EDUCATION

B.Tech - Artificial Intelligence & Data Science

K. Ramakrishnan College of Technology, Trichy
December 2027
GPA: 7.69

HSC

Periyar Maniammai Girls' Higher Secondary School, Trichy
March 2023
76.5%

SSLC

Periyar Maniammai Girls' Higher Secondary School, Trichy
March 2021
Pass

SKILLS

- AWS Cloud Services
- Full Stack Development
- Data Science
- Java
- Python (Basic)
- Git & GitHub
- Research & Analysis
- Problem Solving & Logical Thinking

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate, AWS (25/11/25)
- JLPT N5 – Japanese Language Proficiency Test, Japan Foundation (12/08/25)
- Design Thinking – A Primer, NPTEL IIT Madras (4 week course 2025)
- Full Stack Development (React.js & Node.js Workshop) (15/03/25)
- Data Scientist Master's Program, Simplilearn (30/08/24)
- SkillNova – AI-Powered Career Guidance & Skill Development Platform, Wadhvani Foundation Ignite Bootcamp (11/04/26)

LANGUAGES

- Japanese – JLPT N5 Certified (Basic Proficiency)

OBJECTIVE

Motivated Artificial Intelligence and Data Science student with practical experience in cloud computing, full-stack development, and data-driven projects. Passionate about innovation, technology, and cross-cultural collaboration. Possesses strong adaptability, problem-solving abilities, and a commitment to continuous learning. Aspires to build a global career by contributing to advanced technology projects and gaining international industry experience.

PROJECTS

- Smart File Agent – Agentic AI File Search Assistant**
Developed an Agentic AI-powered file search assistant for intelligent file and folder search using natural language queries.
Technologies: Python, Flask, HTML, CSS, JavaScript
- Multi-Layered Cloud Security Architecture (Team Project)**
Developed an AI and blockchain-based cloud security framework for secure data protection and threat detection.
Technologies: Python, AWS, Blockchain, Machine Learning
- Context-Aware Smart Ambulance Priority and Traffic Routing System (Team Project)**
Developed a smart ambulance routing system with real-time traffic analysis and signal prioritization.
Technologies: Python, Flask, OSRM API, MySQL
- Big Data-Based Precision Agriculture System (Team Project)**
Developed a smart agriculture solution using Big Data and Machine Learning for crop recommendation.
Technologies: Python, Apache Spark, PySpark, Machine Learning
- SOLVITA: Smart Safety Keychain**
Developed a solar-powered safety device with SOS alerts, GPS tracking, and emergency notifications.
Technologies: Arduino, GSM, GPS, Embedded C

INTERNSHIP

AWS Intern, Cloud TechOn (February 2026 - March 2026)

- Acquired hands-on experience in managing cloud infrastructure and administering Linux systems.
- Participated in deployment and monitoring of cloud solutions, contributing to technical learning and practical application.
- Completed AWS and cloud computing internship training, developing foundational knowledge in cloud technologies.

Full Stack Development Intern, NoviTech R&D Private Limited (April 2025 - May 2025)

- Created user-friendly web applications with JavaScript and React, focusing on user engagement.
- Gained hands-on experience developing frontend and backend web applications.
- Enhanced problem-solving skills and streamlined development workflow.

ACHIEVEMENTS

- II Position - Two-Day Workshop cum TechFest, Department of AI
- Research Paper Presentation on Heart Disease Prediction
- 1st Place - Zonal Chess Championship (Women's Category), Anna University Zone-14
- Participant - TANCAM Hackathon (TNWISE 2025)
